

Chapter - 1

GENERAL INFORMATION

SUNDARBAN TIGER RESERVE

GENERAL INFORMATION

- Background
- Present Status
- Significance of Sundarban Mangroves
- Boundaries

BACKGROUND

India's globally renowned conservation scheme 'Project Tiger' was launched on 23rd December, 1973, in Sundarbans. It thus has the distinction of being one of the first nine Tiger Reserves to be declared in the country. The Sundarbans Tiger Reserve (STR) is situated in the coastal districts of West Bengal, i.e. South 24-Parganas and North 24-Parganas (Arbesi Block only). It lies at the southern-most extremity of the lower Gangetic delta bordering the Bay of Bengal. The Sundarbans can be described as a maze of estuaries, river channels, and creeks encompassing a number of

islands (105) of various shapes and sizes. The Tiger Reserve has an area of 2584.89 sq. km. and along with the Bangladesh's Sundarbans forms the largest contiguous tract of mangrove forest anywhere in the world. It is the only mangrove forest throughout the world (besides Bangladesh) to harbour significant tiger population. Apart from the tiger, the Sundarban Tiger Reserve also has a rich array of biodiversity values both floral and faunal.

PRESENT STATUS

The Indian Sundarban has a forest area of 4,263 sq. km. of which 2,584.89 sq.km. has been designated as Sundarban Tiger Reserve (STR), w.e.f. 23.12.1973. Within this Tiger Reserve, 1699.62 sq. km. has been designated as the Critical Tiger Habitat (CTH) vide Notification No. 6028-For, dated 18.12.2007. Within this CTH, lies the Sundarban National Park having an area of 1330.12 sq. km. area notified vide No. 2867-FOR, dated 04.05.1984. The area outside the CTH is known as Buffer Zone notified vide No. 615-For/11M-28/07, dated 17.02.2009. Within the buffer area is located the Sajnekhali Wildlife Sanctuary covering an area of 362.42 sq. km. vide Notification No. 5396-FOR, dated 24.06.1976. Rest of the area is the multiple use zone, which is used by the local population to fulfil their *bonafide* needs. The importance of this area was recognized by the UNESCO and the area was accorded the status of a World Heritage Site in the year 1987. (now renamed as World Heritage Property).

SIGNIFICANCE OF SUNDARBAN MANGROVES

The Sundarbans mangrove eco-system is considered to be unique because of its species, richness due to its diverse mangrove flora, which constitutes the mangrove-associated flora, back mangrove species and several endemic typical mangrove associated fauna of different groups. In addition to its floral richness, the Sundarbans harbours many rare and endangered animal species apart from the Royal Bengal Tiger. These include the estuarine crocodile (*Crocodilus porosus*), water monitor lizard (*Varanus salvator*), globally endangered Batagur Terrapin (*Batagur baska*), sea turtles, viz. Olive Ridley (*Lepidochelys olivacea*), Green sea turtle (*Chelonys mydus*), Hawksbill turtle (*Eretmochelys imbricata*), fishing cats (*Felis viverrina*), smooth coated otters (*Lutra perspicillata*), the Gangetic (*Platanista gangetica*) & Irrawady (*Orcaella brevirostris*) dolphins and the rare African visitor Goliath Heron (*Ardea goliath*) are some of the mentionable species among 53 such rare and endangered animals. In addition to the above, there have been

recorded 20 identified species of prawns and 44 species of crabs including two edible ones. The mangrove forest acts as the nursery for the finfish and shell fish and sustains the fisheries all along the eastern coast of India. It also shelters the metropolis of Kolkata from cyclonic storms and tidal surge.

BOUNDARIES

The Sundarbans Tiger Reserve is bound in the east by the international boundary with Bangladesh formed by the rivers Harinbanga, Raimangal and Kalindi. On the south lies the Bay of Bengal. The western border is formed by the river Matla, which acts as a common boundary with the territorial Forest Division of South 24-Parganas. Towards the north-west, the area is bound by rivers Bidya and Gomdi. All the fringe villages lie outside the Tiger Reserve along the northern boundary.

There exist two distinct ecological units of mangrove vegetation as are given below:

1. The western portion lying west of river Thakuran where a trickle of sweet water reaches from the river Hooghly, i.e. mostly in the South 24-Parganas Forest Division.
2. The central mangrove patch, which is practically cut off from the upstream flow and is fed by backwaters of Bay of Bengal lying between rivers Harinbanga and Thakuran. The Sundarbans Tiger Reserve falls under this area. The salinity regime is very high here. However, on the eastern side bordering Bangladesh river Kalindi receives some sweet-water flow, as a result, the salinity levels are comparatively low.

SIGNIFICANCE OF SUNDARBAN TIGER RESERVE

- One of the first nine Tiger Reserves declared under the Project Tiger scheme in the year 1973.
- The National Park area of the Tiger Reserve is a natural World Heritage property, which was declared in the year 1985.
- The Sundarban Tiger Reserve is a part of the Sundarban Biosphere Reserve, which is one of the few globally recognised Biosphere Reserves in the country. It was declared as a Biosphere Reserve in the year 1989.
- It constitutes over 60% of the total mangrove forest area in the entire country and has 90% of the total Indian mangrove species
- There are 140 plant species under 59 families and 101 genera which have been reported from the entire Biosphere region by Naskar *et al.* These comprise of true mangroves or major elements, minor elements of mangroves or/and mangrove associates, back mangrove trees and shrubs, non-halophytic non-mangrove associates in the area, halophytic herbs, shrubs, and weeds and epiphytic and parasitic plants.
- The Sundarbans has been classified as a Tiger Conservation Landscape of global priority, as it is the only mangrove habitat (along with the Bangladesh), which support a significant tiger population.
- The Tiger Reserve is home to a large number of endangered and globally threatened species like the tiger (*Panthera tigris tigris*), fishing cat (*Felis viverrina*) and estuarine crocodile (*Crocodilus porosus*), Gangetic (*Platanista gangetica*) and Irrawady Dolphin (*Oracella brevirostris*), king cobra (*Ophiophagus hannah*), water monitor lizard (*Varanus salvator*) etc.

Annual Report 2017-18

- It harbours significant populations of the river terrapin (*Batagur baska*), which was once believed to be extinct.
- It is the nesting ground for marine turtles like Olive Ridley (*Lepidochelys olivacea*), Green sea turtle (*Chelonia mydas*) and Hawksbill turtle (*Eretmochelys imbricata*).
- The mangroves serve as nurseries to shell fish and fin-fishes and sustain the coastal fisheries of the entire eastern coast.
- A number of heronries are formed here during monsoon, which harbour large bird populations, which come and breed here. Also, during the winters it is home for Trans-Himalayan migratory birds. Goliath heron (*Ardea goliath*) is another important bird is found in the area.
- It is known as a kingfisher's paradise as out of the 12 species of kingfishers found in the country 8 species are found here.
- Two species of horse shoe crabs (which are considered as living fossils as they are thought to be more than 400 million years old), i.e. *Tachypleus gigas* and *Carcinoscorpius rotundicauda* out of the four species found in the world are found here.
- The mangrove forests trap debris and silt and stabilise the near shore environment. Certain mangrove species also act as bio-filters as they have been found to bio-accumulate heavy metals. They filter ground-water and storm-water runoff which often contains harmful pesticides. They recharge the ground water by collecting rain water and slowly releasing it to the underground reservoir.
- The mangrove forests act as a natural shelter belt and protect the hinterland from storms, cyclones, tidal surges, sea-water seepage and intrusion.

NON-TIMBER FOREST PRODUCE

Honey and bees-wax are the minor forest produce, which are collected during the months of April and May. Sundarban Tiger Reserve issues permits every year for honey collection. The honey so collected is deposited at different godowns of the Tiger Reserve for storage and subsequent disposal by handing over the same to West Bengal Forest Development Corporation Limited. Earlier, Golpata (*Nypa sp.*) and Hental (*Phoenix sp.*), which were collected by the fringe villagers, was discontinued in 1978 and 1991 respectively. The coupe operation has been discontinued since the year 2001.

Non-timber Forest Produce (wild honey collection):

Year	2013-2014	2014-2015	2015-16	2016-17	2017-18
Crude Honey Collection in Kg	20,950	47,412	33,515	19,050	15,000
Total Permit Issue	98	160	91	82	68
Total Man Involvement	735	1155	979	604	486

PLANTATION

SUNDARBAN TIGER RESERVE

PLANTATION

Sundarban Tiger Reserve

- **MANGROVE PLANTATION**
- **NON-MANGROVE PLANTATION**

To meet the local demand of small-wood and fuel-wood, mangrove plants are artificially regenerated on the mud-flats adjoining the fringe villages of the Tiger Reserve. Non-mangrove plantations are also raised along village roads and earthen embankments to cater to the needs of the local people. Plantations (Mangrove and Non-mangrove) raised by Sundarban Tiger Reserve during last 8 (*eight*) years are given below:

Mangrove Plantation:

Year	Range	Area (in ha.)	Location
2007-08	SWLS	25.00	Pakhiralaya.
	Basirhat	10.00	Bhuruliapara & Bagnapara.
	NP (E)	5.00	Sonakhali (near Hogal river char).
	NP (W)	10.00	Bidya.
Total:		50.00

One State Armed Police Camp is posted at Jhila under Bashirhat Range headquarters. It also functions as a Special Strike Force and assists the field staffs in patrolling, raids and tiger rescue operations.

- **State Armed Police Force Camp established in the year: 2000**
- **No. of State Armed Police personnel posted: 5+1**

Rank of highest ranked officer posted in the Camp: Head Constable

Two BSF camps have been established at Khatuajhuri and Bagna camps under Bashirhat Range. They along with the field staff carry out joint patrolling operations besides performing their day to day duties.

No. of BSF personnel posted: 6+1 (Khatuajhuri) and 9+1 (Bagna Camp)

Name of highest ranked officer posted in the Camp: Sub-Inspector

PROTOCOL FOR CREATION AND MAINTENANCE OF NYLON NET FENCING:

Background:

Nylon-net fence has been found to play an important role in preventing the straying out of tigers into village's areas from forest. A protocol for maintenance of the nylon-net fencing has been designed with an aim of carrying out thorough checking and proper maintenance. The Protocol includes involvement of local Stakeholders in FPC/EDC members also along with forest staff.

Rangewise location of the existing Nylon-Net fence and its maintenance is given below:

Range	Total Length of Nylon-Net Fencing	Location
N.P.(W)	20 km. (inclusive of khal guards)	• From Belegudam khal to Nawbanki khal
S.W.L.S.	36 km. approx. (inclusive of khal guards)	• Pirkhali Khal to Pakhirkhal : 5 Km approx • Pakhirkhal to Lalitkhali: 9 km. approx • Lalitkhali to Ranjit's khal: 5 km. approx. • Ranjit's khal to Duttar Beat: 6 km. approx. • Duttar Beat to Kakmari Khal : 11 km. approx
BHT	40 km. approx. (inclusive of khal guards)	• Shamsernagar (Kalindi River side) to Jhingekhali Beat: 13 km. approx. • Ranimangal river to Jhilla river (Arbesi-2 Comptt.): 7 km. approx. • Jhilla Compound to Kakmari khal: 20 km. Approx.

Fencing checking Protocol: A Fencing Register will be kept in each station and records will be kept in accordance to the parameters given below:

Sl.No.	Rank	Frequency	Remarks
1	Concerned Forest Guard	Daily	He will take at least one concerned FPC/EDC Member & both will jointly sign in Fencing checking Register.
2	Concerned Beat Officer	Weekly once	He will take the Joint Convenor of concerned FPC/EDC Member & both will jointly sign in Fencing checking Register.
3	Concerned Range Officer	Once in 15 days	He will take the Concerned Forest Guard or Beat Officer along with and will report to DFD/STR in detail as well as will mention in fencing checking Register.
4	Asstt. Field Director/STR	Once in a month	They will check the fencing in the field to verify that the same has been maintained properly.
5	Dy. Field Director/STR	Once in six weeks	He will check the fencing in the field to verify that the same has been maintained properly.

Parameters for fence checking:

The total length of Nylon Net fencing has to be checked as proposed on following parameters:

- Height of Nylon Net fencing maintained (***The height should be of 10 ft minimum; (in case of new fencing) and 8.0ft (in case of old fencing)***)
- Height of Khal guard to be maintained at least 5 ft above from the highest tidal level estimated for '***Kotal***' period.
- Condition of nylon rope of the net (***(if the net found brittle, immediately it should be changed after bringing it to due notice to the concerned authority)***)
- Condition of the posts of the fencing (***(if found rotting at the base, to be changed immediately after bringing it to due notice to the concerned authority)***)
- Condition of the runner (***(the tensile strength to be checked) GI runners to be used.***)
- Condition of khal guard (***(if sagging noticed, to be repaired immediately)***)
- Monitoring frequency (***(as proposed)***)

'Reverse funnel 'made by nylon-net fences at khal mouth should be maintained with at least 50mt. side wing.

- Fencing posts will be changed from 'Bain' to 'Goran' to bamboo in phases depending on availability of the same.

Introduction of E-Patrolling at STR:

Age-old pattern, procedure and practise of traditional patrolling and wildlife monitoring had some limitations with only use of manual pen, pencil and papers along with prolonged and time-bound use of RT system. Main constraints were time dependency on RT network, errors and time-consumptions in manual entry, possibilities of data manipulation and absence of real-time data. It was to overcome all of these limitations E-patrol/ Smart patrolling was introduced in Sundarban Tiger Reserve in this year.

In this new system every camp has been given a smart phone with a mobile application namely 'Hejje' (written in Java language) installed on it for monitoring and patrolling purpose. With this software/application the front-end staffs are recording their every possible activity like patrolling, fencing checking, night patrols, offence detections, wildlife sightings etc.

Those real time recorded data will directly be going into main database which is made by MySQL RDBMS (Relational Database Management System) via a server mobile app which receives SMSs from the field phones and converts and sends them to the main server database in the form of raw data

That real time patrolling data, which has been well tabulated, analysed and synchronised into the main server database, can directly be monitored instantly by the monitoring applications loaded in the smart phones of senior hierarchy.

Other than that multiple reports of versatile types and patterns can easily be fetched out from that said database at any time through the web.

BATAGUR BASKA CONSERVATION PROJECT:

Introduction:

Batagur baska (Gray, 1830) – commonly known as Northern River Terrapin, is four-toed terrapin, giant river Turtle belonging to the family Geoemydidae, and order Testudines. It is listed as a critically endangered in the IUCN Red List, 2006, and also in the “Top Twenty-Five Turtles in Trouble” published by Turtle Conservation Coalition in 2011. It is also listed in the Appendix–I of CITES and commercial international trade in specimens of the species is prohibited. Once it was widely distributed in India, Bangladesh, Myanmar, Thailand, Cambodia, Indonesia, Malaysia and Singapore. It is extinct in the wild from Thailand, Myanmar and Vietnam.

The Indian subcontinent has one of the richest assemblages of chelonians in the world with 28 freshwater and land species. Out of the four freshwater species (*Batagur baska*, *Callagur broneoensis*, *kachuga trivittate*, *Pelochelys bibroni*) inhabiting brackish water of tropical Asia, two species viz., Northern River Terrapin (*Batagur baska*) and Asian Giant Softshell turtle (*Pelochelys bibroni*) are found in India. Although both species had wide distribution in South-East Asia, both are rare throughout its distributional range. *Batagur baska* was once very common in India in parts of West Bengal viz. in Hoogly river mouth of West Bengal ,in the mid 19th century (Blyth in. Gunther 1864), where it has been reported to be extinct today and also in Sundarbans. It also has been reported to be extinct from Orissa mangroves mainly due to uncontrolled exploitation of its egg and flesh.

However, in 1983 it was rediscovered in Sundarban Tiger Reserve (Moll 1990). This was indicative of a few individuals, if not population was still dwindling in Sundarbans, India. In India and Bangladesh, remaining individuals are so few and scattered that the only way to recover and re-establish this species in its wild habitat is by acquiring wild terrapins, captive propagation and population re-establishment at a suitable time and place. In 1988 initiative was taken by Sundarban Tiger Reserve management and after intensive survey three clutches were detected and artificial hatching was conducted successfully. During the 1981-1991 period 18 nests were recorded by field staffs of Sundarban Tiger Reserve. In 1992-1993 survey conducted by Wildlife Institute of India only one nest was recorded (Bhupathy et al,1995). However in 1994 survey no nests were recorded (Bhupathy et al,1995).

At present Sundarban is the only known abode of *Batagur baska* in India. West Bengal Forest Department with the help of Turtle Survival Alliance-India have been trying to recover this species since 2008. In August 2008, 12 *Batagur baska* were captured from Sajnekhali range of Indian

Sundarban which led to reinstating of breeding programme in Sundarban Tiger Reserve after a hiatus of 20 years. Accordingly 33 Batagur baska hatchlings were reported during 2012 and are now being successfully reared at the hatching enclosure in Sajnekhali. They are being reared with the active participation and support of Turtle Survival Alliance (TSA). There has been no mortality of the hatchling during this period. It has been resolved that two year old Batagur hatchling or Batagur baska weighing one kg will be released in the wild after habitat survey with the active assistance of TSA. The successful re-introduction of Batagur baska in Sundarban will eventually restore critically endangered species in the wild again.

Soft Release of Northern River Terrapin in Sundarban Tiger Reserve:

During March 2014, selected river stretches were surveyed for soft release of the individuals. As per the protocol a temporary enclosure was constructed at the creek of Chamta khal. On 17/01/2016, 10 (six female and four males) juvenile Batagur baska were released at the creek of Chamta khal, fitted with ultrasonic transmitter with a temperature sensor.

Setting up of Assurance Colony:-

Assurance colony was set up at three places apart from Sajnekhali within the Sundarban Tiger Reserve in order to avoid congestion, disaster, depredation and over-crowding of individuals hatching every year and also as a precautionary measure in case of any contagious disease breakdown all the individuals will not be lost in case of emergency. As Sundarban is a storm prone area it became compulsory to set up assurance colony in order to avoid mishaps when in 2009 Alia hit Sundarban one male was lost due to overflow of the breeding pool.

Present stock of Batagur baska in Assurance Colony			
Assurance Colony	Male	Female	Total
Chamta	7	13	20

TIGER MONITORING IN SUNDARBAN TIGER RESERVE

Tiger Monitoring a well-devised monthly monitoring system where direct tiger sightings and other evidences (indirect) of presence of tigers and their movements in the Tiger Reserve are being recorded, as per the directive of National Tiger Conservation Authority (formerly known as 'Project Tiger'). The table given below shows a summary of the month-wise scenario for the whole year:

Month	Direct Sighting		Heard of Roaring	Sighting of Fresh Pugmark	
	Adult	Cub		Adult	Cub

ECO - TOURISM

SUNDARBAN TIGER RESERVE

ECO-TOURISM

ECO-TOURISM IN SUNDARBAN TIGER RESERVE:

Sundarban has always been alluring to the tourists who come here to enjoy the scenic beauty of the pristine mangrove forests. Since inception of Tiger Reserve there has been a steady increase of visitors to the area. The tourists entering the Tiger Reserve have to take a permit after paying the entry fees. Presently, the entry of the tourists is restricted mainly within the Buffer area. Near about 35% tourist inflow increases than last year which have created huge pressure on Biodiversity.

TOURISTS VISITING THE AREA:

YEAR	No. of Tourists (per entry point) [including Crew Member]												TOTAL

Total Amount due: **Rs 1,44,00,087.00 – shall be disbursed in upcoming financial year.**

CHAPTER 15

OTHER IMPORTANT EVENTS & ACTIVITIES

Swachha Bharat Abhijan: Sundarban Tiger Reserve Management along with the active participation of the local people, JFMC members, school children and local NGOs, strives to implement the goals of this cleanliness drive campaign launched in 2nd October 2014 by the present Prime Minister. Awareness programmes at the Range level and a centralised programme at Sajnekhali were organised in order to motivate and make the local people realize the importance and need for cleanliness and sanitation.

Global Tiger day: Established in 2010 at the Saint Petersburg Tiger Summit, July 29th is dedicated to the worldwide awareness and support for tiger conservation. Less than a century ago, 1,00,000 tigers roamed the forests of Asia, but today only about 3,000 tigers survive in the wild. With the four primary issues of poaching, habitat destruction, man-animal conflict, and diminishing prey base being more rampant than ever before, the future of India's iconic big cat remains uncertain.

Thus, Sundarban Tiger Reserve Management on this occasion takes up awareness programmes with the help of local NGOs to different schools where children are enlightened about the importance of conservation of this umbrella species its prey and also its habitat. The other activities include rallies in different villages involving the children to spread awareness amongst the common mass.

. Being a part of the tiger conserving authorities, the Sundarban Tiger Reserve has initiated the celebration of this festival also in this year. A report is furnished below in details:-

1. Morning Rally with School Children :-

The programme began with a demonstrative morning rally by school children of Pakhirala High School and Rangabelia HS School, volunteers of NGO named SHER and forest staff. School children were in school uniform and with a top demonstrative polo supplied to them by department. They came by boat and then on foot up from jetty ghat. Participants were almost 200 in numbers.

2. Meeting with awareness programme:-

Awareness meeting and campaign was held at NIC, Sajnekhali, presided by Smt. Nilima Karan, Sabhapati, Gosaba panchayat Samiti, chaired by Dr R.P. Saini, IFS, Director, Sundarban Biosphere Reserve, the chief guest of the programme, Shri Nilanjan Mallick, IFS, CCF & FD, STR, Shri Ajoy Kr. Das, IFS, DFD/STR, Shri Shyamapada Chakraborty, Sahasabhapati, Gosaba Panchayat Samiti, Shri Ranjit Kr. Hauli, Karmadhakshya, Ban-o-bhumi Sthayee Samiti et.al. along with pleasant presence of GS and representatives of SHER, representatives and members of all the 26 JFMCs under STR and local Panchayat bodies along with respective pradhans.

Apart from the discussion on wildlife conservation and awareness creation through the speeches, deliberated phase wise, the honourable officers and public representatives have unveiled the posters on wildlife conservation and representatives and members of the organisation SHER presented gift of honour to the staff-officers of the Sundarban Tiger reserve up to the level of the Range Officers for their outstanding performance and contribution into their working field.

3. Cultural Programme on Conservation :-

Finally a fine tuned cultural programme on wildlife and ecosystem conservation has been produced by the folk band 'Agnish'.

Banamahotsab :

Ban Mahotsav is a festival which was started by Kulapati Arnab Patra, the Union Minister for Agriculture and Food during in 1950 to create enthusiasm among masses for forest conservation and planting trees. It is now a week-long festival, celebrated on different days in different parts of India, but usually in the month of July.

Traditionally Sundarban Tiger Reserve has initiated the celebration of this festivals in this year on and from 14.07.2018, is furnished below in details:-

2. Sub-divisional level programme at Gosaba :-

- Sub-divisional programme was celebrated at Gosaba Block, NPE Range, Headquarters areas.
- Programme started with a morning rally with school children alongwith demonstrative placards and festoons.
- After rally ceremonial plantation programme held at the school, Gosaba R. R. Institutions in presence of respected MLA, Gosaba, Savapoti, Gosaba Panchayet Samity, Jt. B. D. O. Gosaba, Representative of O. C. Gosaba, Kharmadhaksha, Ban-O-Bhumi Stayee Samity & the Forest Officials, rights from Field Director, Sundarban Tiger Reserve, Deputy Field Director, Sundarban Tiger Reserve, up to all Range Officers of Sundarban Tiger Reserve alongwith Forests Staff.
- Awareness campaign along with cultural programmes was carried out during second phase of programme.

3. Apart from that Banahatsav, will be celebrated in different ranges by following way :-

A. Sajnekhali Wildlife Sanctuary Range :-

Morning rally, awareness programme and ceremonial plantation done at :- (1) Santigachi F. P. School, (2) Tiplighari Bazar, (3) Pakhirala Abyetanik F. P. School, (4) Uttarpolly F. P. School, (5) Jamespur F. P. School, , (6) Binapani F P. School.

B. Basirhat Range :- The morning rally, ceremonial plantation as well as awareness campaign were carried out at :-

(1) Kumirmari Addibasipara F. P. School, (2) Binapani F. P. School, (3) Saroda F. P. School, (4) Hentalbari Primary School, (5) Natobar High School, and (6) Kalitala Primary School

C. National Park West Range:- Banahatsav Programme was celebrated at National Park West Range areas by means of morning rally, ceremonial plantation and awareness campaign.

The following schools have been selected for the purpose :- (i) Bali Dhonantori Model High School, (ii) Bali Nimnobuniadi Biddyalay, (iii) Uttar Bijohnagar Gaganendra Sriti Colony Prathomik Biddyalay, (iv) Bijohnagar Adarsha Biddyamandir, (v) Bijohnagar Aboytonik Prathomik Biddyalaya, (vi) Balipurbopara Prathomik Biddyalaya.

D. National Park East Range :- Apart from sub-divisional programme Banmahatsov will be celebrated with morning rally, awareness campaign and ceremonial plantation in the following sites :- (i) Arampur Girls F. P. School, (ii) Banitala F. P. School, (iii) Hansa Colony F. P. School (iv) Barabari FP School,

Total Planting Spots = 22 spots @ 50 saplings in average = 1100 Nos.

Apart from the above mentioned celebration programmes, respected M.L.A., Gosaba was provided one thousands seedlings free of cost for planting in his assembly areas and that planting programmes was carried out during Banomahotsab – 2017.

Wildlife Week:

Wildlife Week is celebrated all over the country in the month of October with the great vision of conservation of the Indian flora and fauna by spreading awareness.

This year wild life week has been observed at Sundarban Tiger Reserve by involving the students from various schools of the JFMC areas in a study tour and a drawing competition with the theme of wildlife conservation, in turns making the young minds aware about the need to strengthen the same.

Visit of Hon'ble Minister of Science & Technology, Earth Sciences and Environment, Forest, and Climate Change:

Dr. Harsh Vardhan, Hon'ble Minister of Science & Technology, Earth Sciences and Environment, Forest, and Climate Change, visited Sundarban Tiger Reserve on 7th April, 2018, evening. The following day the Hon'ble Minister visited the Mangrove Interpretation Centre and *Batagur baska* captive breeding facility at Sajnekhali; he also interacted with the staffs of Sajnekhali. Later following a cruise along the islands of Sundarban Tiger Reserve, the Hon'ble Minister visited Netidhopani camp, which is the site of the UNESCO World Heritage Site monument. After a brief interaction with the staffs the the Hon'ble Minister continued with his onward journey to the Jharkhali Tiger Rescue centre and subsequently back to Kolkata.

Management Effectiveness Evaluation of Sundarban Tiger Reserve:

The Management Effectiveness Evaluation (as carried out by a experts of NTCA for all the national parks and wildlife sanctuaries of the country every four years) was carried out by Mr. B.K. Singh, retired Principal Chief Conservator of Forests, Kerela, and his team between 9th to 11th February, 2018, based on a structured questionnaire on all the aspects of Management of the national park. The team also visited different parts of the tiger reserve, evaluated the ground realities relevant to the management and also evaluated the efficacy of the strategies implemented in the tiger reserve. Sundarbans has been the evaluated as one of the best managed tiger reserves of the country.

Security audit of Sundarban Tiger Reserve:

The National Tiger Conservation Authority assigned the Global Tiger Forum to conduct security audit of all the tiger reserves of the country. In this context a team led by Dr. Rajeev Srivastava

(Former PCCF, Tamil Nadu), conducted the audit at Sundarban Tiger Reserve from 7th to 10th March, 2018. Different aspects for the management of the tiger reserve were evaluated based on a structured questionnaire and supporting documents to the questions. The team also visited different parts of the tiger reserve, interacted with the staffs and officials of the tiger reserve evaluated the ground realities relevant to the implementation of various management strategies in the tiger reserve.

ANNEXURE

GOVERNMENT OF WEST BENGAL FOREST DEPARTMENT FOREST NOTIFICATION

No. 2867-For./11B-6/83.—4th May 1984.—Whereas by notification No. 3640 For., dated the 6th June 1978 published at page 1361 of Part I of the “Calcutta Gazette” dated the 13th July 1978, the Governor was pleased to declare his intention to constitute the forest lands covering an approximate area of 1330.10 sq. kms. and comprising reserve forest blocks and compartments, in the district of 24-Parganas, more fully described in the Schedule below (hereinafter referred to as the said lands) as a National Park to be called the “**Sunderbans National Park**” for the purpose of protecting, propagating and developing wild life therein;

And whereas more than two months from the date of such proclamation have elapsed for preferring claim, as required under clause (b) of section 21 of the Wild Life (Protection) Act, 1972, (53 of 1972), (hereinafter referred to as the said Act);

And whereas no claim has been preferred under section 19 of the said Act;

And whereas all rights in respect of the said lands have been vested in the State Government;

Now, therefore, in exercise of the power conferred by sub-section (4) of section 35 of the said Act, the Governor is pleased hereby to specify in the Schedule below the limits of the said lands comprising the reserve forest blocks and compartments and declare that with effect from the 14th May 1984, the same shall be a National Park to be called the “**Sunderbans National Park**” for the said purpose.

The Schedule

A. Situation:

DISTRICT : 24-PARGANAS

Forest lands covering an approximate area of 1330.10 sq. kms. and comprising the following reserve forest blocks and compartments:—

Blocks	Compartments
Matla	1 to 4
Chamta	4, 5, 6, 7 and 8
Chhotahardi	1 to 3
Gosaba	1 to 4
Gona	1 to 3
Baghmara	2 to 8
Mayadwip	1 to 5

B. Boundaries:

North	:	Reserve forest blocks and compartments, namely, Netidhopani-1, 2 and 3; Chamta-3 and 2; Chandkhali-2 and 4; and Baghmara-1.
East	:	Harinbhanga river adjoining the international boundary with Bangladesh.
South	:	Bay of Bengal.
West	:	Matla river.

By order of the Governor,
R.N. DE
Secy. to the Govt. of West Bengal

**GOVERNMENT OF WEST BENGAL
FOREST DEPARTMENT
FOREST
NOTIFICATION**

No. 5396-For/—24th June 1976—Whereas the area whose situation and boundaries are described in the Schedule below (hereinafter referred to as the said area) is considered to be of adequate ecological, faunal, natural and zoological significance;

Now, therefore, in exercise of the power conferred by sub-section (1) of section 18 of the Wild Life (Protection) Act, 1972 (53 of 1972), and in supersession of such part of all previous notifications as declared the said area or part thereof as a sanctuary, the Governor is pleased hereby to declare, with effect from the date of publication of this notification in the Official Gazette, the said area to be a sanctuary to be known as Sajnekhali Wild Life Sanctuary for the purpose of protecting, propagating and developing wild life and its' environment.

The Schedule

A. Situation:

District : 24-Parganas

24-Parganas Forest Division, Basirhat Range (Part) covering an approximate area of 362.40 Sq. Km. and comprising following forest blocks and compartments:—

Blocks	Compartments
Panchamukhani	1 to 5
Pirkhali	1 to 7

B. Boundaries:

North	:	Bara Herobhanga Khal, Gomdi Khal and Pitch Khal.
East	:	Duttar Gang.
South	:	Part of Gosaba river and Netidhopani Khal.
West	:	Bidya river.

By order of the Governor,
A.K. GUPTA
Dy. Secy. to the Govt. of West Bengal

**Government of West Bengal
